

tuün™

Biohacking Enhancement Technology

R E S O N A T E

**tuün™**, pronounced [tune], is a state-of-the-art wearable biohack that contains our proprietary **Biohacking Enhancement Technology (B.E.T.)** designed to help you stay "finely tuned" amid a world of outward and inward stressors, including electromagnetic fields (EMFs) and other electrosmog that is ever-present in today's modern and convenience-oriented lifestyle.

### A Biohack Solution For a Health Concern

At the cellular level, **your body is electric**. Cells in your body communicate using microscopic electric signaling. This is how your nervous system functions. Slight changes in the polarization of your cells can lead to significant chemical changes in your body.

**Electromagnetic hypersensitivity (EHS)** is a phenomenon characterized by the appearance of symptoms after prolonged exposure to electromagnetic fields.

### SUCH SYMPTOMS INCLUDE:

Heating of body tissues and cells

Increased free radical production in your body

Chronic fatigue, headaches, brain fog

Heightened anxiety

To make matters worse, a large body of research on the effects of electromagnetic radiation has proven that technology is getting increasingly harmful to human health. Just recently, the World Health Organization classified all **radiofrequency radiation** from mobile devices as a **potential class 2B carcinogen**.

# Living in Harmony With Electronic Devices

There's so much rogue **EMF radiation in today's world**, not the least of which comes from our favorite devices - our cell phones. As technology takes greater hold, so do the levels of radiation you're being exposed to every day.

According to **David O. Carpenter, professor of environmental health sciences at the University at Albany**, you are exposed to **1,000,000,000,000,000x** (1 quintillion) times more radiation than you were ten years ago.

More than an EMF shield pendant, **tuün™ Resonate** works to assist with tuning out the chaos while enhancing your overall health & well-being. **tuün™** is assembled with earth-grounding-frequencies and other oxidative reaction reducers to offset the effects of EMF radiation and **restore balance to your body**.

## Earthing & tuün™ RESONATE

Earthing (also known as grounding) refers to contact with the Earth's surface electrons by walking barefoot outside, lying on the ground, or simply being in nature. Earthing is a healing technique that realigns your electrical energy by reconnecting with the Earth. **tuün™** is designed to enhance the effects of earthing and bring balance, strength, and sleep while providing relief from constant stress, tension, and fatigue.

BLACK

ROSE GOLD

## Proprietary Technology + Field Tested

**tuün™ Resonate** includes advanced technology to help the body fight off electromagnetic pollution and other harmful stressors to help the body to function more optimally. Benefits of wearing **tuün™** include:

Improves Sleep Quality

Improves Focus and Mood

May Decrease Electromagnetic Hypersensitivity Symptoms

Aids in Enhancing Vitality

Helps Reduce Free Radical Damage

May Help Enhance The Sense of Well Being

## Try this at home!

Letting go of our devices is hard, but that doesn't mean you can't have a safe bubble. Consider dedicating at least one device-free room inside your house (not outdoors).

## Instructions for use:

For optimal results, simply wear your pendant or carry it in your pocket. May also be placed under your pillow at night.
